Manual bag inserter

EasyOpen

The fastest way for manual bag placing.

The patented Easy Open system provides you the easiest way to pick a single bag from a bundle to place it in your boxes or crates. This is done by an ingenious hanging system consisting of a perforation and a pre cut in your bags and special pins to hang them. The stands are adjustable in height, equipped with castors and store two bundles of bags, one at each side.

The result: you save up to 50% on your manual bag placing time and make a more ergonomic and less boring job!
